A tribute to Scotland's unsung heroes

The introduction of the world's first main line railway between Liverpool and Manchester in 1860 was the start of our nation's long love affair with steam, not to mention the dawn of a golden age for both travel and trade

Yet back in the heyday of steam, for every glamorous express like the Flying Scotsman, there were a hundred little-known locomotives plving the nation's railways: serving commuters and guarries, holidaymakers and factories. Cared for by a vast army of drivers and firemen, engineers and mechanics, they were part of British life all the way through to the 1960s.

Classic Locomotives of Scotland is the second Special issue in our series of four to commemorate these unsung workhorses of the railway network. The series began with Classic Locomotives of England in 2011 and will continue with Northern Ireland and complete with Wales in future issues.

Like the rest of the series Classic Locomotives of Scotland features superb archive photography of steam locomotives, in both the Special Stamps and the Miniature Sheet horder. As hefits such an important Special issue, it also includes a beautifully written and lavishly illustrated Presentation Pack.
